INTERVIEW STUDIO

Example report - handcrafted demonstration

Python Developer | Junior | 1 questions

AI-generated practice material. Review accuracy. Scores are advisory, not hiring decisions.

Test Python fundamentals.

Assumption: Junior role

Question 1 - Dictionaries

Technical | Easy | 5 minutes

How would you handle a missing dictionary key?

Expected answer / evidence

Use get, membership checks, or handle KeyError.

Follow-up probes

- When would you use get?

- How does defaultdict differ?

Scoring rubric - 10 points

Approach (4 points)

Zero credit: No usable approach.

Partial credit: Names an approach without explaining behavior.

Full credit: Explains an approach and its behavior with an example.

Behavior (3 points)

Zero credit: No usable approach.

Partial credit: Names an approach without explaining behavior.

Full credit: Explains an approach and its behavior with an example.

Example (3 points)

Zero credit: No usable approach.

Partial credit: Names an approach without explaining behavior.

Full credit: Explains an approach and its behavior with an example.

Your saved answer

I use get with a default to avoid a KeyError.
